

MAVERICK SOURCING & PROCUREMENT

Most Supply Chains Aren't Built to Scale. We Fix That.

Mid-market manufacturers lose millions every year to fragmented suppliers, dirty data, and procurement processes never built for growth. We find it, fix it, and build the foundation your operation actually needs.

We embed with your team to do the unglamorous work that actually moves the needle: consolidating supplier bases, recovering lost margin, cleaning the data, and building procurement operations that scale. No platform pitch. No vendor agenda. Just results.

PROVEN. BOTTOM LINE. IMPACT.

8-15%Hard cost savings
per engagement**30-60**Days from audit
to roadmap**15+**Years in manufacturing
supply chains**5 pts**Higher EBITDA at
procurement-led manufacturers**WHERE MANUFACTURERS LOSE MARGIN EVERY DAY**

The leaks are real. Most companies just haven't found them yet.

Fragmented supplier bases. Off-contract spend. Pricing that varies by location and buyer. ERP systems layered with years of acquisitions and workarounds. These are not edge cases. They are the standard operating environment for most mid-market manufacturers. And they cost real money every single day.

Supplier Consolidation Score**01**

Most manufacturers carry 20-40% more suppliers than their spend justifies. We cut the dead weight, strengthen the relationships that matter, and build a leaner network.

Cost Leakage Analysis**02**

Off-contract spend and stale vendor agreements drain margin invisibly every day. We find every dollar before it becomes permanent.

Data Cleanliness (ERP / PO / Pricing)**03**

If you cannot trust your own data, neither can AI. We clean your ERP records, PO history, and pricing so every decision starts from solid ground.

Automation Opportunity Mapping**04**

We show you exactly where automation delivers ROI today and where rushing it creates risk. You get a clear roadmap, not a vendor pitch.

Sourcing Stabilization**05**

Volatile costs and long lead times are supplier strategy problems, not software problems. We build the contract discipline and structure to solve them.

WHO THIS IS FOR

One problem. Four different situations.

● PE Exit Manufacturers

Supply chain strength is a direct valuation driver. We make procurement a selling point, not a due diligence red flag.

● Under New PE Ownership

Modernization mandate, tight timeline, messy foundation. We have been here before. We move fast without breaking what works.

● Operations Leaders

You inherited the supplier base, the inconsistencies, and the tribal knowledge. We bring structure and a proven process.

● CFOs and COOs

Know what your procurement operation is actually costing you before deciding what to invest in next. We show you.

**The savings are in there.
We will find them.**
